Full Electric Pallet Truck

SY-E-PT

Short introduction:

- ✔ An electric pallet truck, also known as an electric pallet jack or electric pallet mover, is a type of material handling equipment that is used to move and lift pallets within a warehouse or distribution center.
- ✔ It is powered by electricity and operates with the help of a rechargeable battery that powers the motor.
- ✔ Electric pallet trucks are commonly used in commercial settings due to their ability to increase productivity and improve efficiency.

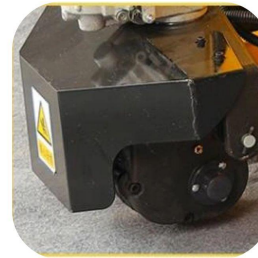

Battery Portable Handle:

Easy to disassemble and move.

Brushless Toothed Motor:

High-power brushless motor ,Strong torque, double-driver;

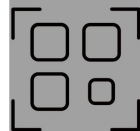

Simple Operation Handle:

Smart and flexible operation.

Thick Clean Steel Spring:

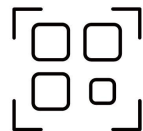

Long-lasting excellent elasticity.

Specifications

Product	Electric pallet truck
Rated LiftingCapacity	2T
specification(mm)	685*1200
Length of the fork mm	1200
Battery capacity	48V20Ah
Speed	5km/h
Weight	155
Battery type	Lead-acid battery

Factory 

Wide Application
