## Manual Stacker

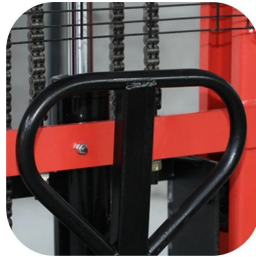

SY-M-MS

### Short introduction:

- ✔ The hand stacker is a multi-functional logistics equipment with a wide range of applications. It is suitable for some low-height stacking occasions.
- ✔ It is characterized by simple operation, light weight, high quality, low price, and easy maintenance.
- ✔ One of the most popular stacking machines in the logistics industry.

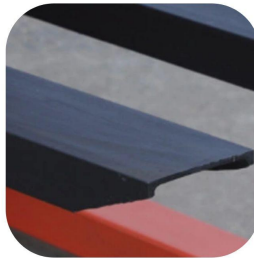

### Handle:

User-friendly design easy to use.

### Reinforced chain:

More stable and durable.

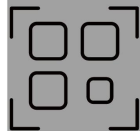

### Left and right adjustable forks:

Forks that can move left and right to meet different handling needs.

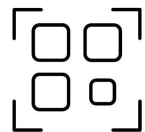

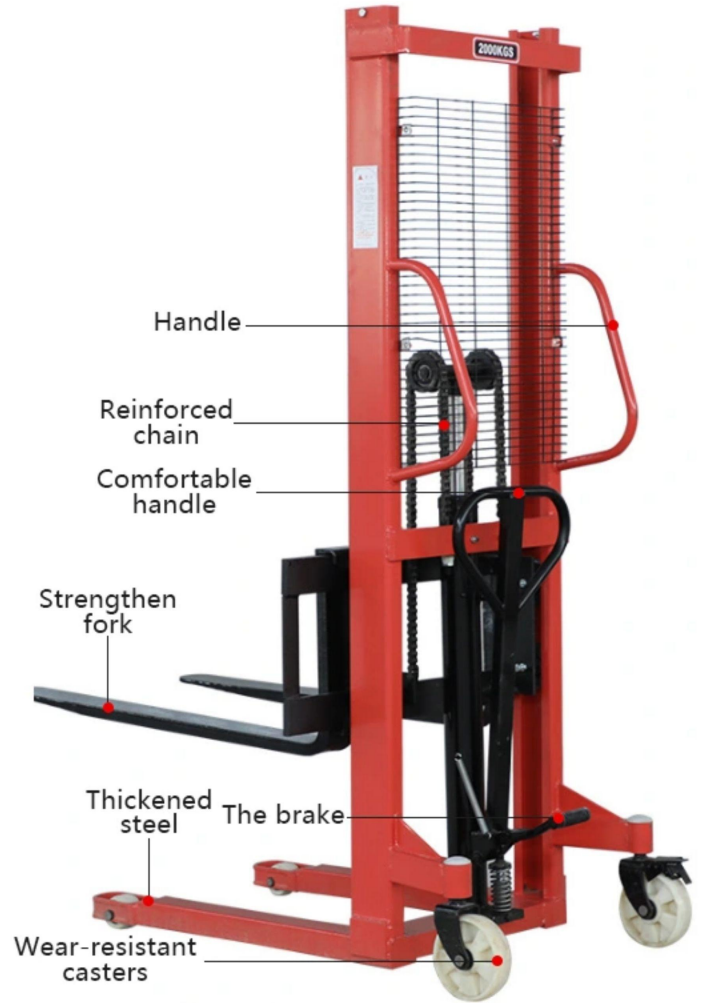

### Extended pedal assist:

Foot-operated hydraulic lifting system, the lifting speed is stable and energy saving.

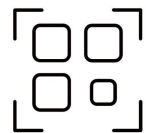

Specifications
