## Tank Cargo Trolley

SY-E-TCT

### Short introduction:

- ✔ The tank cargo trolley is a type of industrial equipment used for transporting heavy equipment, materials, and machinery in a warehouse or production facility.
- ✔ It typically features a flat platform that can hold large and bulky items. Tank cargo trolleys are often equipped with casters or wheels for easy maneuverability, and some models may even have adjustable height settings to accommodate different loads.

- ✔ They are commonly used in industries such as manufacturing, transportation, and logistics where heavy-duty material handling is required.

### **360° rotating non-slip pattern:**

The black disc can be rotated 360°  
Circular patterns on the disc increase friction, the goods are not easy to drop.

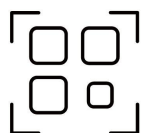

### **Seamless welded tie rod:**

Using seamless welded tie rods, stable and reliable.

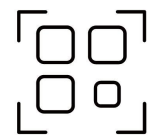

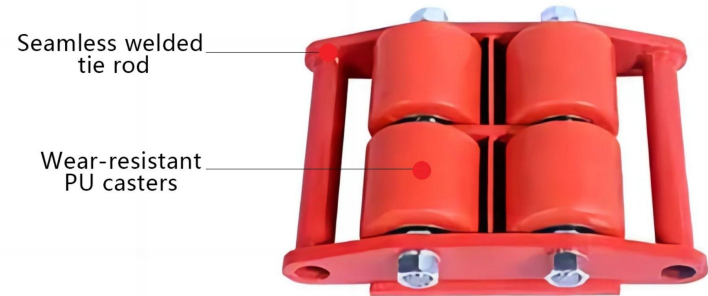

### **Wear-resistant PU casters:**

Can play a certain role in shock absorption, easy maintenance, strong elasticity.
