Semi-Electric Stacker

SY-E-SES

Short introduction:

✔ A semi-electric stacker is a stacker that combines electric and human operations. It uses an electric motor to drive the vehicle to move, and lifts the cargo through human operation.

- ✔ Compared with fully electric stackers, the cost and maintenance costs of semi-electric stackers are relatively low. The fluent outline make it stand out from traditional stacker.
- ✔ Made of high quality steel to ensure stability and strength. Durable and serviceable. Coated with backed -paint layer, it is corrosion-resisting and durable.

Steel frame:

High quality steel frame ,compact design with strong steel construction for perfect stability, accuracy and high lifetime.

Multi-function meter:

The multi-function meter can display the vehicle working status, battery power and working time.

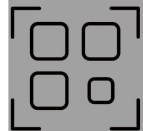

Lead-acid cell :

Use maintenance-free battery with deep discharge protection. The high storage battery ensures strong and long-lasting power.

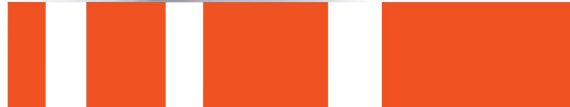

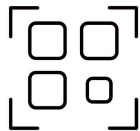

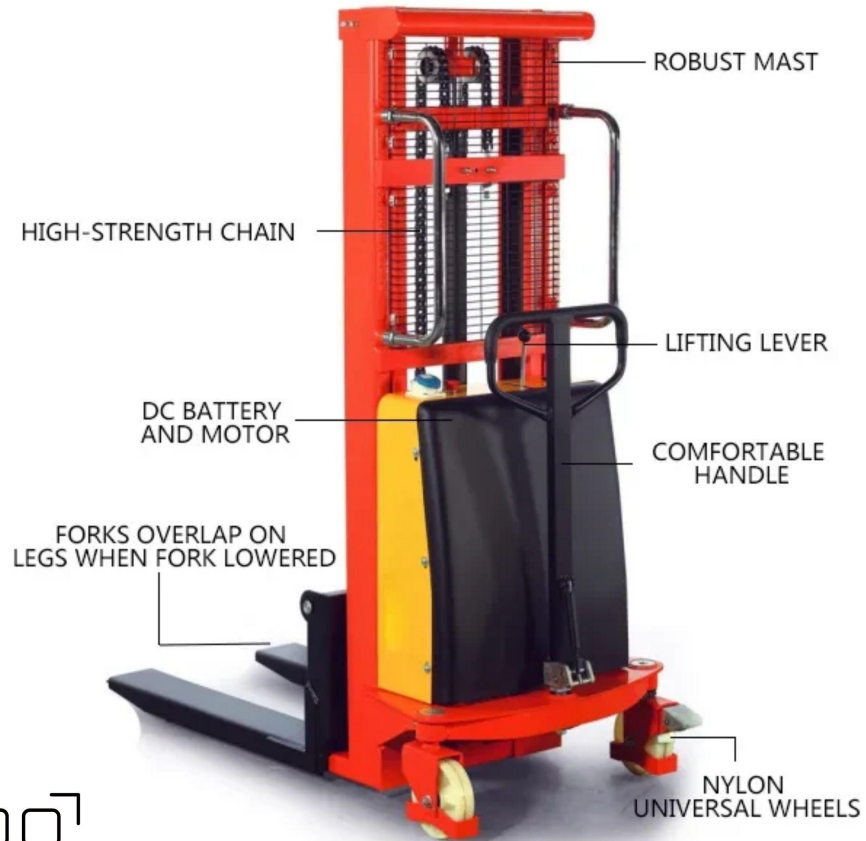

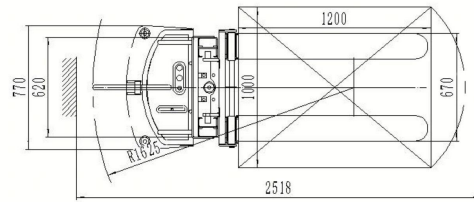

Wheel:

Wheels with protective measures to maintain the safety of the operator.
