## Semi-Electric Off-Road Pallet Truck

SY-SE-ORPT

### Short introduction:

- ✔ The semi-electric off-road pallet truck is a specialized pallet jack designed for use in rugged terrain. It features two systems of power, electric and hydraulic, to enhance its performance and efficiency.
- ✔ The electric system is used for low-speed operations or for moving pallets indoors, while the hydraulic system can handle heavier loads and is used for off-road or heavy-duty applications. The off-road pallet truck is equipped with large, durable tires and advanced suspension and traction controls for stability and maneuverability in difficult terrain.
- ✔ This vehicle is ideal for industries such as forestry, agriculture, and construction, where heavy loads need to be moved over uneven ground or rough terrain.

#### **Heavy strength bearing capacity:**

Designed for harsh conditions, off-road type cattle frame, high torque power easy to handle daily climbing and bumpy road.

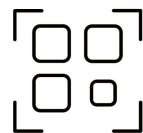

#### **Comfortable handle:**

The keys are simple and clear the integrated functions are complete, and the operation is easier to use.

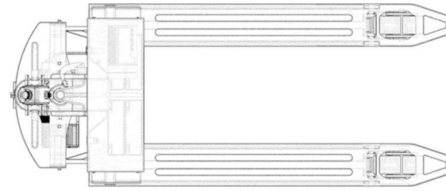

#### **Larger Tires Better Pass Ability:**

Equipped with 350x100mm solid tire large size wheel foot to provide better pass ability all solid tire, anti-skid wear stronger grip.

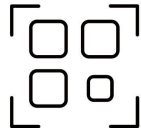

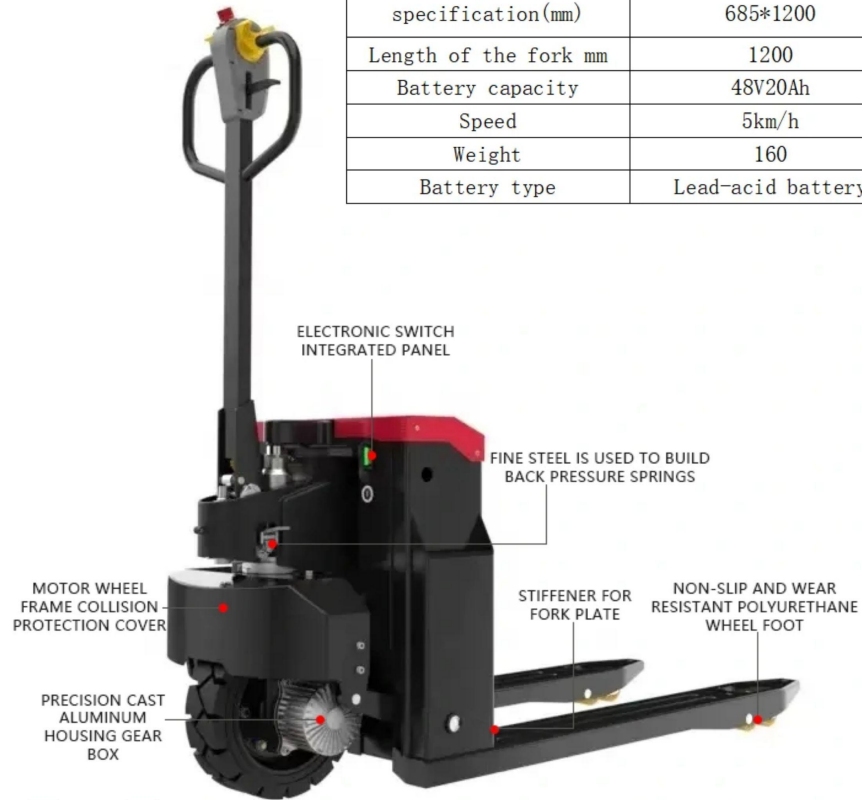

## Specifications

Rated Lifting Capacity	3T
specification (mm)	685*1200
Length of the fork mm	1200
Battery capacity	48V20Ah
Speed	5km/h
Weight	160
Battery type	Lead-acid battery

Factory 

Wide Application
