## Stand-Drive Electric Stacker

SY-E-SDS

### Short introduction:

✔ The STAND-DRIVE ELECTRIC STACKER is a type of material handling equipment used for lifting and stacking loads in warehouses, distribution centers, and other industrial settings.

✔ To ensure operator safety, the stacker typically includes features such as a safety sensor system, emergency stop button, and stability-enhancing mechanisms.

✔ This stacker allows the operator to stand on a platform while operating the machine, offering comfort and convenience during long working hours.

### Thickened fuselage:

High quality thickened steel, high steel ratio, more durable.

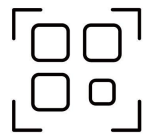

### Thickened fork:

Integral forming thickened integral fork, stronger load bearing and less wear and deformation.

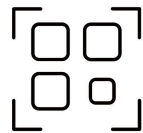

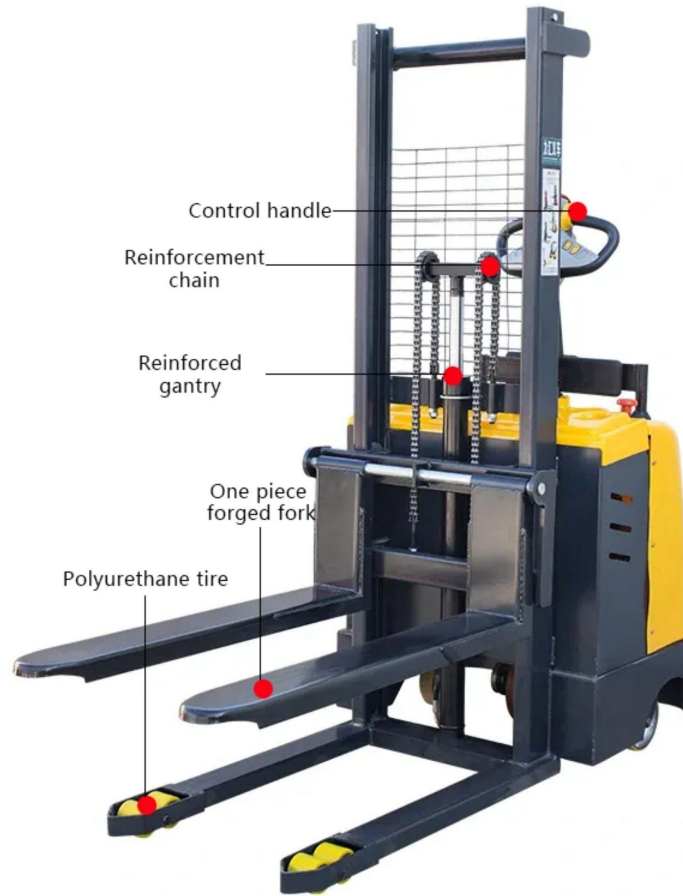

### Handle:

Accord with human body design, save time and effort, efficient work.
